

Leaf and Limb Collection

The City of Austell Public Works provides pick-up of leaves and limbs to all residents within the city limits. By diverting and mulching leaf and limb materials, we are meeting the requirements set forth by the State of Georgia in 1996, which states that no yard waste may be disposed of in landfills, thereby saving valuable space.

Yard waste shall be collected in the following manner:

- **PICK UP:** One (1) load per week, per customer for leaves and one (1) load per week, per customer for limbs.
- Branches, Limbs, and shrubbery piles shall be neatly stacked parallel to the street, next to the curb, no later than Monday at 7:00 AM for collection.
- Collections will be completed by zone. (See below)
- **ZONE 1:** Leaf Collection will begin on Monday and Limb Collection will begin on Tuesday of each week.
ZONE 2: Leaf collection will begin on Wednesday and Limb Collection will begin on Thursday of each week.
- Limbs and branches may not exceed the following: Limbs sizes can be no bigger than 6 inches in diameter, must be cut 6 feet in length, limb piles can be no taller than 4 feet and limb piles are to be no wider than 4 feet.
- All leaves and yard waste should be placed in brown paper bags. **NO PLASTIC BAGS WILL BE PICKED UP.**
- Leaves and limbs shall be separated and not mixed.
- The City of Austell shall not collect yard waste transported from locations other than the point of collection.
- If a company is hired to do landscaping of any kind, the yard waste is to be disposed of by that company. This is to include tree removal / cut down.
- The City will not pick up any root ball or tree stumps of any kind.
- The Public Works Director may limit the amount of yard waste collected at any one location.
- City of Austell crews and equipment used in the collection of yard waste may leave behind small debris. This is the responsibility of the resident (and not The City of Austell) to clean up.

Collection of all leaves and limbs is once per week. The Public Works ‘Service Request’ document (link below) is used as a *backup* method to ensure that the driver retrieves the leaves and limbs from your location. Using this tool will ensure that your address is not missed.
